SUMMARY

WILLIAM remote microphone is optional on THOMAS.

This manual explains the features in two parts. **"THOMAS ASC"** and **"WILLIAM ASC"**. All the features for the **WILLIAM ASC** or for the **THOMAS ASC** using the **optional remote SPK/MIC** are preceded by the ✐ icon and writed using this font style.

With the **WILLIAM ASC** or when you use the remote microphone accessory on **THOMAS ASC**, two items are added at the end of the Menu contents for adjustment of remote microphone features:
- DIMMER
- LCD CONTRAST

WARNING !

*Before using, be careful never transmit without first having connected the antenna (connection "**B**" situated on the back panel of the equipment) or without having set the SWR (Standing Wave Ratio) ! Failure to do so may result in destruction of the power amplifier, which is not covered by the guarantee.*

MULTI-NORMS TRANSCEIVER!

The guarantee of this transceiver is valid only in the country of purchase.

Welcome to the world of the new generation of CB radios. The new PRESIDENT range gives you access to top performance CB equipment. With the use of up-to-date technology, which guarantees unprecedented quality, your PRESIDENT THOMAS ASC is a new step in personal communication and is the surest choice for the most demanding of professional CB radio users. To ensure that you make the most of all its capacities, we advise you to read carefully this manual before installing and using your PRESIDENT THOMAS ASC CB Radio.

A) INSTALLATION

1) WHERE AND HOW TO MOUNT YOUR MOBILE CB RADIO

a) You should choose the most appropriate setting from a simple and practical point of view.

b) Your CB radio should not interfere with the driver or the passengers.

c) Remember to provide for the passing and protection of different wires (e.g. power, antenna, accessory cabling) so that they do not interfere in any way with the driving of the vehicle.
MOUNTING DIAGRAM
d) To install your equipment, use the cradle (**1**) and the self-tapping screws (**2**) provided (drilling diameter 3.2 mm). Take care not to damage the vehicle's electrical system while drilling the dash board.

e) Do not forget to insert the rubber joints (**3**) between the CB and its support as these have a shock-absorbing effect which permits gentle orientation and tightening of the set.

f) Choose where to place the microphone support and remember that the microphone cord must stretch to the driver without interfering with the controls of the vehicle.

- **N.B. :** As the transceiver has a frontal microphone socket, it can be set into the dash board. In this case, you will need to add an external loud speaker to improve the sound quality of communications (connector EXT.SP situated on the back panel: **C**). Ask your dealer for advice on mounting your CB radio.

2) ANTENNA INSTALLATION

a) *Choosing your antenna*
- For CB radios, the longer is antenna, the better its results. Your dealer will be able to help you with your choice of antenna.

b) *Mobile antenna*
- Must be fixed to the vehicle where there is a maximum of metallic surface (ground plane), away from windscreen mountings.
- If you already have a radio-telephone antenna installed, the CB antenna should be higher than this.
- There are two types of antenna: pre-regulated which should be used on a good ground plane (e.g. car roof or lid of the boot), and adjustable which offers a much larger range and can be used on a smaller ground plane (*see p. 8 § 5, Adjustment of SWR*).
- For an antenna which must be fixed by drilling, you will need a good contact between the antenna and the ground plane. To obtain this, you should lightly scratch the surface where the screw and tightening star are to be placed.
- Be careful not to pinch or flatten the coaxial cable (as this runs the risk of break down and/or short-circuiting).
- Connect the antenna (**B**).

c) *Fixed antenna*
- A fixed antenna should be installed in as clear space as possible. If it is fixed to a mast, it will perhaps be necessary to stay it, according to the laws in force (you should seek professional advice). All PRESIDENT antennas and accessories are designed to give maximum efficiency to each CB radio within the range.
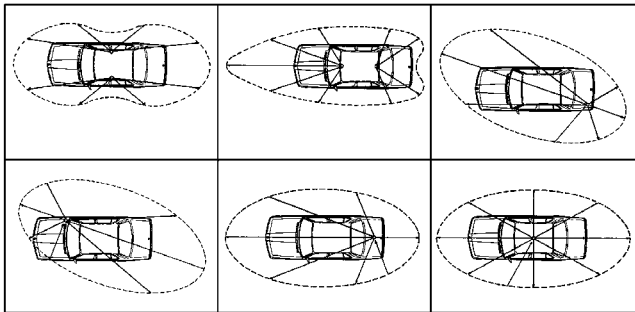

3) POWER CONNECTION

Your PRESIDENT THOMAS ASC is protected against an inversion of polarities. However, before switching it on, you are advised to check all the connections. Your equipment must be supplied with a continued current of 12 volts (**A**). Today, most cars and lorries are negative earth. You can check this by making sure that the negative terminal of the battery is connected either to the engine block or to the chassis. If this is not the case, you should consult your dealer.

WARNING: Lorries generally have two batteries and an electrical installation of 24 volts, in which case it will be necessary to insert a 24/12 volt converter (type CV 24/12 PRESIDENT) into the electrical circuit. The following connection steps should be carried out with the power cable disconnected from the set.

a) Check that the battery is of 12 volts.
b) Locate the positive and negative terminals of the battery (**+** is red and **-** is black). Should it be necessary to lengthen the power cable, you should use the same or a superior type of cable.
c) It is necessary to connect your CB to a permanent (**+**) and (**-**). We advise you to connect the power cable directly to the battery (as the connection of the CB cable to the wiring of the car-radio or other parts of the electrical circuit may, in some cases, increase the likelihood of interference).
d) Connect the red wire (**+**) to the positive terminal of the battery and the black (**-**) wire to the negative terminal of the battery.
e) Connect the power cable to your CB radio.

OUTPUT RADIUS PATTERNS

Towards starter

Connected to chassis
WARNING: Never replace the original fuse (2 A) by one of a different value.

4) BASIC OPERATIONS TO BE CARRIED OUT BEFORE USING YOUR SET FOR THE FIRST TIME (without transmitting and without using the «push-to-talk» switch on the microphone)

a) Connect the microphone.
b) Check the antenna connections.
c) Turn the set on by pushing and holding the **POWER** knob (**1**).
d) Turn the squelch knob (**3**) to minimum (***M*** position).
e) Adjust the volume to a comfortable level.
f) Go to Channel **20** using either the «**UP**» «**DN**» key (**5**) on the microphone or the rotary knob (**5**).

5) ADJUSTMENT OF SWR (Standing wave ratio)

WARNING: This must be carried out when you use your CB radio for the first time (and whenever you re-position your antenna). The adjustment must be carried out in an obstacle-free area.

* *Adjustment with an external SWR meter (e.g. TOS-1 President)*

a) To connect the SWR meter :
- Connect the SWR meter between the CB radio and the antenna as close as possible to the CB (use a maximum of 40 cm cable, type President CA 2C).
b) To adjust the SWR meter:
- Set the CB to channel 20 in FM.
- Put the switch on the SWR meter to position CAL or FWD.
- Press the «push-to-talk» switch on the microphone to transmit.
- Bring the index needle to ▼ by using the calibration key.
- Change the switch to position SWR (reading of the SWR level). The reading on the Meter should be as near as possible to 1. If this is not the case, re-adjust your antenna to obtain a reading as close as possible to 1. (An SWR reading between 1 and 1.8 is acceptable).
- It will be necessary to re-calibrate the SWR meter after each adjustment of the antenna.

WARNING: In order to avoid any losses and attenuations in cables used for connection between the radio and its accessories, PRESIDENT recommends to use a cable with a length inferior to 3m.

Your CB is now ready for use.

B) HOW TO USE YOUR CB

1) POWER ON/OF CONTROL

Push and hold **POWER** knob（**1**).

🎙 *Push and hold **POWER** key (**1**) of the remote SPK/MIC.*

Power on/off is switched alternately.

Current volume and configuration is displayed after 3 seconds

Wake up display when remote SPK/MIC is connected

2) VOLUME CONTROL

Rotate **VOL** knob (**1**).

🎙 *Push **VOL** ▲ / ▼ key (**2**) of the remote SPK/MIC.*

Main unit volume is 43 steps from 0 to 42. But remote SPK/MIC volume is 8 steps from 0 to 7.

See Loudspeaker Mute page 24.

Rotate VOL knob

synch

Rotate VOL knob

synch

3) ASC (Automatic Squelch Control) / SQUELCH

Suppresses undesirable background noises when there is no communication. Squelch does not affect neither sound nor transmission power, but allows a considerable improvement in listening comfort.

a) ASC: AUTOMATIC SQUELCH CONTROL

Worldwide patent, a PRESIDENT exclusivity.
Turn the **SQ** knob (**3**) anti-clockwise into **ASC** position.

🔊 *Press* **SQL** *key* (**3**) *on the remote SPK/MIC during 1,5 second*

"ASC" appears on the display. No repetitive manual adjustment and a permanent improvement between the sensitivity and the listening comfort when ASC is active. This function can be disconnected by turning the knob clockwise. In this case the squelch adjustment becomes manual again. **"ASC"** disappears from the display.

b) MANUAL SQUELCH

Turn the **SQ** knob (**3**) clockwise to the exact point where all background noise disappears. This adjustment should be done with precision as, if set to maximum (fully clockwise), only the strongest signals will be received. With this setting, *RSQ* (remote squelch function of the remote SPK/MIC) is stopped.

c) MANUAL SQUELCH OF REMOTE SPK/MIC

🔊 *Press* **SQL** *key* (**3**) *on the remote SPK/MIC. The remote squelch level is selectable (3 levels). Push* ▲ / ▼ *key* (**5**) *to select the level. Push* **ENTER** (MENU) *key* (**11**) *to store the setting.* **"RSQ"** *is displayed.*

$$59LoF \leftrightarrow 59L-1 \leftrightarrow 59L-2 \leftrightarrow 59L-3$$

🔊   *SQL - 1* ↔ *SQL - 2* ↔ *SQL - 3*

With this setting, manual squelch function of the main unit is stopped. When the **SQL** *level is* **OFF**, *remote squelch is inactive,* **"RSQ"** *disappears and manual squelch knob form the unit* (**3**) *is active.*

4) S/RF METER

SRF meters indicate the receiving signal strength in **RX** mode.

THOMAS ASC   **WILLIAM ASC**

ASC work (Automatic Squelch Control)

SQ knob is active (Analog squelch)

SQ knob is inactive. Remote SQ (=digital threshold) is active (Remote squelch RSQ)

Middle strength signal

The **SRF meter** is used as RF power indicator in **TX** mode.

SRF meter indicators are 8 steps from 1 (weak) to 7 (strong), and 0 (no signal).

Input voice

5) CHANNEL SELECTOR: rotary knob and UP/DN keys of the microphone

These switches allow increasing or decreasing a channel. A «beep» sounds each time the channel changes if the **Key Beep** function is activated. *See **KEY BEEP** function page 21.*

Rotate Channel knob (**5**), or push and hold ▲ / ▼ key (**5**) of standard MIC.

✏ *Push or push and hold ▲ / ▼ key (**5**) of remote SPK/MIC.*

6) MODE SELECTOR AM/FM ~ LO/DX

a) MODE SELECTOR AM/FM *(short push)*

This switch allows selecting the AM or FM modulation. Your modulation mode has to correspond to the one of your correspondent.
Amplitude modulation/AM: is for communications in areas where there are obstacles and over medium distances.
Frequency modulation/FM: for nearby communications in flat, open field.

Push **AM/FM** key (**6**).

✏ *Push **AM/FM** key (**6**) of the remote SPK/MIC.*

AM/FM are switched alternately.

AM setting

FM setting
AM/FM *2nd function (only in **U** configuration)*

Allows to alternate the frequency bands **CEPT** and **ENG** in the **U** configuration. When the **ENG** frequency band is selected, **"UK"** is displayed.

CEPT/ENG are switched alternately.

Switching of CEPT and ENG in U configuration (ENG - ENGLAND)

b) LO/DX *(long push 1,5 s)*

Allows the automatic adjustment of the **RF Gain** for close communication.
Push and hold **LO/DX** (AM/FM) key (**6**).

🖉 *Push and hold **LOCAL/DX** (AM/FM) key (**6**) of the remote SPK/MIC.*

LO/DX is switched alternately.

LO/DX switching (Local)

7) MEM ~ SCAN

a) MEM *(short push)*

Those functions are memorized when memory command is done:
Mode AM/FM ~ Channel number ~ CTCSS tone or DCS code.

MEM STORE (8 memories)

1. Select the channel to be memorized.
2. Push **MEM** key (**7**).
3. With the rotary knob (**5**) or the ▲ / ▼ key (**5**) of the standard microphone, select the memory to be stored (number from *1* to *8*).
4. Push and hold **MEM** key (**7**) to store the selected channel. Memorized data on memory number is displayed for 2 seconds.
5. After 2 seconds the unit returns to usual display.

MEMORY Store 1

MEMORY Store 3

🖉 *MEM STORE (8 memories)*

1. Select the channel to be memorized.
*2. Push **MEM** key (**7**) of the remote SPK/MIC.*
*3. With the ▲ / ▼ key (**5**) of the remote SPK/MIC, select the memory to be stored (number from **1** to **8**).*
*4. Push and hold **MEM** key (**7**) of the remote SPK/MIC to store the selected channel. Memorized data on memory number is displayed for 2 seconds.*
5. After 2 seconds the remote SPK/MIC returns to usual display.

MEMORY Store 4

MEM CALL

1. Push **MEM** key (**7**).
2. With the rotary knob (**5**) or the ▲ / ▼ key (**5**) of the standard microphone, select the memory to be called (number from 1 to 8).
3. Push **MEM** key (**7**) to select the memorized channel.

🖉 *MEM CALL*

1. *Push **MEM** key (**7**) of the remote SPK/MIC in normal RX mode.*
2. *With the ▲ / ▼ key (**5**) of the remote SPK/MIC, select the memory to be called (number from **1** to **8**).*
3. *Push **MEM** key (**7**) of the remote SPK/MIC to select the memorized channel.*

MEM CLEAR

1. Clear of all memory is possible by turning on **POWER** (**1**) with **MEM** key (**7**) push.
2. All memories are cleared at configuration change *(see page 23)*.

b) SCAN *(long push 1,5 s)*

There are 2 **SCAN** types :
ALL channels **SCAN** type (normal), **"SCAN"** icon is displayed.
MEM channels **SCAN** type, **"MEM"** icon is displayed and **"SCAN"** icon is blinking.

See page 18 for changing type.

Channel research: Allows activating the **SCAN** function (research of the channels) in an increasing way. The scanning stops as soon as there is a busy channel. The scanning automatically starts 3 seconds after the end of the reception signal and no key is activated during 3 s. The scanning starts again in an increasing way by turning the rotary knob to the right, or in a decreasing way by turning the rotary knob to the left.

Push and hold **SCAN** (MEM) key (**7**) to start the **SCAN**.

🖉 *Push and hold **SCAN** (MEM) key (**7**) of the remote SPK/MIC to start the SCAN.*

Both mode AM/FM are scanned alternately.

On the **MEM** **SCAN** type, both emergency channels are scanned with the memorized channels**.**

To disable the **SCAN** function press **PTT** key (**13**) or a new long press on **SCAN** (MEM) key (**7**).

THOMAS ASC

WILLIAM ASC

MEMORY Store 5

Display of normal SCAN mode

Display of memory SCAN mode

8) NB/HIC ~ MON

NB/HIC *(short push)*

NB Noise Blanker. These filters allow reducing back ground noises and some reception interferences. **«NB»** appears on the display when the NB filter is activated.

Hi-Cut Eliminates high frequency interferences. Has to be used in accordance with the reception conditions. **«HIC»** appears on the display when the **HI-Cut** filter is activated.

Push the **NB/HIC** key (**8**) to select the filter alternately.

✒ *Push **NB/HIC** (**8**) of the remote SPK/MIC to select the filter alternately.*

```
      ┌──────→  NB OFF, HIC OFF → NB ON, HIC OFF →
      │
      │         NB OFF, HIC ON → NB ON, HIC ON ──┐
      └──────────────────────────────────────────┘
```
9) MON *(long push 1,5 s)*

The **MON** function deactivates the squelch function, it is used for "fast listening". It works with analogic squelch, ASC, RSQ squelch.

Push and hold **MON** (NB/HIC) key (**8**) to activate the **MON** function.

✒ *Short push **MON** key (**9**) of the remote SPK/MIC to activate the **MON** function. It works with analogic squelch, ASC, RSQ squelch.*

MON function on/off alternately. While this function is active "**MON**" icon blinks and "**BUSY**" icon lights.

10) CH19/9 ~ LOCK

a) CH19/9 *(short push)*

Push **CH19/9** key (**10**) to active instantly these emergency channels.

✒ *Push **CH19/9** key (**10**) of the remote SPK/MIC to active instantly these emergency channels.*

CURRENT CHANNEL → CH 19 (AM) → CH9 (AM)
Setting Filter NB + HIC

Setting transmission of MON

Channel transition of emergency calling
b) LOCK *(long push 1,5 s)*

Push and hold **LOCK** (CH19/9) key (**10**) to lock the unit and remote SPK/MIC.

Following functions are active even if the **LOCK** function is active: **PTT** key (**13**), **SQ** knob (**3**), **VOL** and **POWER** knob (**1**).

✎ *Push and hold **LOCK** (CH19/9) key (**10**) of the remote SPK/MIC to lock the remote SPK/MIC and the unit.*

*Following functions are active even if the **LOCK** function is active : **PTT** key (**13**), **SQL** key (**2**), **VOL** ▲ / ▼ key (**2**) and **POWER** key (**1**).*

THOMAS ASC

Key Lock on

WILLIAM ASC
11) MENU ~ ENTER

a) MENU *(short push)*

Push **MENU** key (**10**) to active the **MENU** mode.

✎ *Push **MENU** key (**10**) of the remote SPK/MIC to active the **MENU** mode.*

Press **MENU** key (**10**) once more, current setting is stored and menu changes from next setting (*see table*).

If no setting is done during 10 seconds, the unit exits from **MENU** mode.

Nº	MENU Item	Effective area	Selectable item	Page
a	CTCSS/DCS setting	/CH	Off , CTCSS: 1 to 38, DCS: 1 to 104	17
b	SCAN TYPE setting	/CH	On/off	18
c	VOX SENSITIVITY LEVEL	/UNIT	off , 1 to 9	18
d	ANTI VOX LEVEL	/UNIT	0 to 9	19
e	VOX DELAY TIME	/UNIT	1 to 9 (0.2, 0.4, 0.6, 0.8, 1, 1.2, 1.5, 2, 3 seconds)	19
f	ROGER BEEP	/UNIT	on/off	20
g	KEY BEEP	/UNIT	on/off	21
h	BACK LIGHT COLOUR [2]	/MAIN UNIT	Orange (o) / Green (G)	21
i	DIMMER [1]	/Remote SPK/MIC	off, LO, HI	22
j	LCD CONTRAST [1]	/Remote SPK/MIC	1 to 10	22

(1) DIMMER and LCD contrast setting appear on THOMAS only when optional remote SPK/MIC is connected. Thus if is not connected, selectable menu items are from a to h.
(2) Function doesn't work on the remote SPK/MIC. This function does not exist on WILLIAM ASC. Items change from g to i.

See the function features on the indicated page.
b) ENTER *(long push 1,5 s)*

Push and hold **ENTER** (MENU) key (**10**) to complete the setting and exit the **MENU** mode.

✎ *Push and hold* **ENTER** *(MENU) key (***10***) of the remote SPK/MIC to complete the setting and exit the* **MENU** *mode.*

12) MICRO PLUG RJ45

The plug is located on the front panel of the transceiver and makes the setting of the equipment into the dashboard easier.

Push 1, pull 2 to remove

See cabling diagram page 31.

13) TRANSMISSION

a) PTT

Transmission key (**13**), press to transmit a message, **TX** is displayed and release to listen to an incoming communication.

✎ *Transmission key (***13***) of the remote SPK/MIC, press to transmit a message,* **TX** *is displayed and release to listen to an incoming communication.*

To transmit, you can also use the **VOX** function.

b) VOX TRANSMISSION

The **VOX** function allows transmitting by speaking into the original microphone (or in the optional vox microphone) without pressing the **PTT** switch. When the **VOX** function is activate «**VOX**» is displayed. The use of an optional vox mike connected to the rear panel of the transceiver (**D**) disables the original microphone.
Limit of continuous transmission is 5 minutes in VOX TX mode. If it is over, a radio mode changes to VOX transmission error condition automatically.
Following three parameters are selectable in menu mode: **VOX sensitivity** - **Anti VOX level** - **VOX delay time**.

✎ *The* **VOX** *function mute the loudspeaker of the* **WILLIAM** *remote SPK/MIC.*

See the VOX Setting parameters on page 18.

PTT Transmission

VOX Transmission

Transmission Error

Transmission Error by ANTI Vox

14) MENU FUNCTIONS

If no setting is done during 10 seconds, the unit exits from **MENU** mode.

a) CTCSS / DCS

DCS/CTCSS code select

CTCSS and DCS can be set on FM mode only.

CTCSS (Continuous Tone Coded Squelch System) and DCS (Digital Codes Squelch) are two tone squelch methods, they replace the manual squelch and simultaneously function similar to a selective call system. Squelch functions often depend on the field strength or are controlled via the signal-to-noise ratio. This means that they always depend on the varying conditions of reception. Each transmission on the selected channel and each interference carrier as well will open the squelch.

All radios belonging to a certain speech circuit have to be operated using the same CTCSS frequency or the same DCS code. The squelch of the receiving radio only opens when a signal featuring the corresponding CTCSS/DCS is received.

The manual squelch and ASC are switched off. CTCSS and DCS still function when the signal is already very weak and has a considerable background noise. 38 CTCSS tones and 104 DCS codes are available.

Push the **MENU** key (**11**) **one** time. Current **CTCSS/DCS** setting is displayed. Rotate the Channel knob (**5**) or push ▲/▼ key (**5**) of the standard microphone to select the **CTCSS** tone or **DCS** code.

oF ↔ CTCSS (1 to 38) ↔ DCS (1 to 104)

🖊 *oFF* ↔ *CTCSS* **(1 to 38)** ↔ *DCS (*1 to104*)*

Push **MENU** key (**11**). Current setting is stored and menu setting changes to next.

Push and hold **ENTER** (MENU) key (**11**) to exit from the mode **MENU**.

🖊 *Push the* **MENU** *key* (**11**) *of the remote SPK/MIC* **one** *time. Current* **CTCSS/DCS** *setting is displayed. Push* ▲/▼ *key* (**5**) *of the remote SPK/MIC to select the* **CTCSS** *tone or* **DCS** *code.*

Push **MENU** *key* (**11**) *of the remote SPK/MIC. Current setting is stored and menu setting changes to next.*

Push and hold **ENTER** (MENU) *key* (**11**) *of the remote SPK/MIC to store and exit from the mode* **MENU**.

See *CTCSS Tone List and DSC Code List page 32.*

b) SCAN TYPE

Push the **MENU** key (**11**) **two** times. Current **SCAN** type setting is displayed. Rotate the Channel knob (**5**) or push ▲/▼ key (**5**) of the standard microphone to select the **SCAN** type.

Push **MENU** key (**11**). Current setting is stored and menu setting changes to next.

Push and hold **ENTER** (MENU) key (**11**) to exit from the mode **MENU**.

✎ *Push the **MENU** key (**11**) of the remote SPK/MIC **two** times. Current **SCAN** type setting is displayed. Push ▲ / ▼ key (**5**) of the remote SPK/MIC to select the **SCAN** type.*

*Push **MENU** key (**11**) of the remote SPK/MIC. Current setting is stored and menu setting changes to next.*

*Push and hold **ENTER** (MENU) key (**11**) of the remote SPK/MIC to store and exit from the mode **MENU**.*

SCAN MEM ᴏ𝗇 ↔ SCAN MEM ᴏF

See **SCAN** function page 13.

c) VOX SENSITIVITY LEVEL - 5L

The VOX Sensitivity Level allows the adjustment of the microphone (original one or optional vox) for an optimum transmission quality. Adjustable level : ᴏF (Off), from 1 (high level) to 9 (low level) .

Push the **MENU** key (**11**) **three** times. Current **VOX SENSITIVITY** setting is displayed. Rotate the Channel knob (**5**) or push ▲/▼ key (**5**) of the standard microphone to select the **VOX SENSITIVITY**.

Push **MENU** key (**11**). Current setting is stored and menu setting changes to next.

Push and hold **ENTER** (MENU) key (**11**) to exit from the mode **MENU**.

✎ *Push the **MENU** key (**11**) of the remote SPK/MIC **three** times. Current **VOX SENSITIVITY** setting is displayed. Push ▲ / ▼ key (**5**) of the remote SPK/MIC to select the **VOX SENSITIVITY**.*

*Push **MENU** key (**11**) of the remote SPK/MIC. Current setting is stored and menu setting changes to next.*

*Push and hold **ENTER** (MENU) key (**11**) of the remote SPK/MIC to store and exit from the mode **MENU**.*

*When **VOX** function is active while a remote SPK/MIC is connected, speaker of remote SPK/MIC is always muted.*

C) TECHNICAL CHARACTERISTICS

1) GENERAL

- Channels	: 40
- Modulation modes	: AM/FM
- Frequency ranges	: from 26.965 MHz to 27.405 MHz
- CTCSS Tones	: 38
- DCS codes	: 104
- Antenna impedance	: 50 ohms
- Power supply	: 13.2 V
- Dimensions (in mm)	: 125 (L) x 38 (H) x 103 (D)
- Weight	: ≃ 0.7 kg
- Accessories supplied	: Electret microphone with support, mounting cradle, screws.
- Filter	: ANL (Automatic Noise Limiter) built-in

2) TRANSMISSION

- Frequency allowance	: +/- 200 Hz
- Carrier power	: 4 W AM / 4 W FM
- Transmission interference	: inferior to 4 nW (- 54 dBm)
- Audio response	: 300 Hz to 3 KHz
- Emitted power in the adj. channel	: inferior to 20 µW
- Microphone sensitivity	: 7 mV
- Drain	: 1,8 A (with modulation)
- Modulated signal distortion	: 2 %

3) RECEPTION

- Maxi. sensitivity at 20 dB sinad	: AM / 0.5 µV - 113 dBm FM / 0,35 µV - 116 dBm
- Frequency response	: 300 Hz to 3 kHz
- Adjacent channel selectivity	: 60 dB
- Maximum audio power	: 2 W
- Squelch sensitivity	: minimum 0.2 µV - 120 dBm maximum 1 mV - 47 dBm
- Frequency image rejection rate	: 60 dB
- Intermediate frequency rej. rate	: 70 dB
- Drain	: 300 mA nominal / 750 mA maximum

D) TROUBLE SHOOTING

1) YOUR CB RADIO WILL NOT TRANSMIT OR YOUR TRANSMISSION IS OF POOR QUALITY

- Check that the antenna is correctly connected and that the SWR is properly adjusted.
- Check that the microphone is properly plugged in.
- Check that the programmed configuration is the correct one (*see table page 33*).

2) YOUR CB RADIO WILL NOT RECEIVE OR RECEPTION IS POOR

- Check that LOCAL DX (**6**) is off.
- Check that the squelch level is properly adjusted.
- Check that the programmed configuration is the correct one (*see table page 33*).
- Check that the volume is set to a comfortable listening level.
- Check that the antenna is correctly connected and that the SWR is properly adjusted.
- Check that you are using the same modulation mode as your correspondent.
- Check the use of a CTCSS tone or a DSC code.

3) YOUR CB WILL NOT LIGHT UP

- Check the power supply.
- Check the connection wiring.
- Check the fuse.

E) HOW TO TRANSMIT OR RECEIVE A MESSAGE

Now that you have read the manual, make sure that your CB Radio is ready for use (i.e. check that your antenna is connected).
Choose your channel (19, 27).
Choose your mode (AM/FM) which must be the same as that of your correspondent.
Press the «push-to-talk» switch and announce your message «Attention stations, transmission testing» which will allow you to check the clearness and the power of your signal. Release the switch and wait for a reply. You should receive a reply like, «Strong and clear».
If you use a calling channel (19, 27) and you have established communication

with someone, it is common practice to choose another available channel so as not to block the calling channel.

F) GLOSSARY

Below you will find some of the most frequently used CB radio expressions. Remember this is meant for fun and that you are by no means obliged to use them. In an emergency, you should be as clear as possible.

INTERNATIONAL PHONETIC ALPHABET

A	Alpha	**H**	Hotel	**O**	Oscar	**V**	Victor
B	Bravo	**I**	India	**P**	Papa	**W**	Whiskey
C	Charlie	**J**	Juliett	**Q**	Quebec	**X**	X-ray
D	Delta	**K**	Kilo	**R**	Romeo	**Y**	Yankee
E	Echo	**L**	Lima	**S**	Sierra	**Z**	Zulu
F	Foxtrott	**M**	Mike	**T**	Tango		
G	Golf	**N**	November	**U**	Uniform		

TECHNICAL VOCABULARY

AM	:	Amplitude Modulation
CB	:	Citizen's Band
CH	:	Channel
CW	:	Continuous Wave
DX	:	Long Distance Liaison
DW	:	Dual Watch
FM	:	Frequency Modulation
GMT	:	Greenwich Meantime
HF	:	High Frequency
LF	:	Low Frequency
LSB	:	Lower Side Band
RX	:	Receiver
SSB	:	Single Side Band
SWR	:	Standing Wave Ratio
SWL	:	Short Wave Listening
SW	:	Short Wave
TX	:	CB Transceiver
UHF	:	Ultra High Frequency
USB	:	Upper Side Band
VHF	:	Very High Frequency

CB LANGUAGE

Advertising	:	Flashing lights of police car
Back off	:	Slow down
Basement	:	Channel 1
Base station	:	A CB set in fixed location
Bear	:	Policeman
Bear bite	:	Speeding fine
Bear cage	:	Police station
Big slab	:	Motorway
Big 10-4	:	Absolutely
Bleeding	:	Signal from an adjacent channel interfering with the transmission
Blocking the channel	:	Pressing the PTT switch without talking
Blue boys	:	Police
Break	:	Used to ask permission to join a conversation
Breaker	:	A CBer wishing to join a channel
Clean and green	:	Clear of police
Cleaner channel	:	Channel with less interference
Coming in loud and proud	:	Good reception
Doughnut	:	Tyre
Down and gone	:	Turning CB off
Down one	:	Go to a lower channel
Do you copy?	:	Understand?
DX	:	Long distance
Eighty eights	:	Love and kisses
Eye ball	:	CBers meeting together
Good buddy	:	Fellow CBer
Hammer	:	Accelerator
Handle	:	CBer's nickname
Harvey wall banger	:	Dangerous driver
How am I hitting you?	:	How are you receiving me?
Keying the mike	:	Pressing the PTT switch without talking
Kojac with a kodak	:	Police radar
Land line	:	Telephone
Lunch box	:	CB set
Man with a gun	:	Police radar
Mayday	:	SOS
Meat wagon	:	Ambulance
Midnight shopper	:	Thief
Modulation	:	Conversation
Negative copy	:	No reply
Over your shoulder	:	Right behind you

Part your hair	:	Behave yourself - police ahead
Pull your hammer back	:	Slow down
Rat race	:	Congested traffic
Rubberbander	:	New CBer
Sail boat fuel	:	Wind
Smokey dozing	:	Parked police car
Smokey with a camera	:	Police radar
Spaghetti bowl	:	Interchange
Stinger	:	Antenna
Turkey	:	Dumb CBer
Up one	:	Go up one channel
Wall to wall	:	All over/everywhere
What am I putting to you?	:	Please give me an S-meter reading.

CERTIFICATE OF CONFORMITY

Nº	Configuration Code	FM Channel	AM Channel	Country
1	EU	40 Ch (4W)	40 Ch (4W)	BE, BG, CH, CY, ES, FI, FR, GR, IE, IS, IT, LT, LV, NL,PT, RO, SE
2	PL	-5 KHz 40 Ch (4W)	-5 KHz 40 Ch (4W)	PL
3	d	80 Ch (4W)	40 Ch (4W)	DE
4	EC	40 Ch (4W)	-	AT, CZ, DK, EE, HU, LU, MT, NO, SI, SK
5	U	CEPT 40 Ch (4W) + ENG 40 Ch (4W)	-	GB

The frequency band and the transmission power of your transceiver must correspond with the configuration authorized in the country where it is used.

*Note: In **U** configuration : In order to select the frequency band **ENG/CEPT**. Push the AM/FM key (**6**). When the frequency band is **ENG**, "**UK**" appears on the display. When the frequency band is **CEPT** "**UK**" disappears from the display.*

Countries in which there are particular restrictions (Licence[1] / Register[2])

	AT	BE	BG	CH	CY	CZ	DE	DK	EE	ES	FI	FR	GB	GR	HU	IE	IS	IT	LT	LU	LV	MT	NL	NO	PL	PT	RO	SE	SI	SK
Licence[1]	①			①									①	①				①			①									
Register[2]								①																		①				
AM	①					①		①	①				①		①					①		①		①					①	①
BLU / SSB	①					①		①	①				①		①					①		①		①					①	①
